Gear ratio	3.25	2	3.32	9
	(0.403)		(0.345)	

Notes: Stata's 1978 automobile data. Price is in dollars and mileage in miles per gallon. Arithmetic means with sample SDs in parentheses and variable-specific N; no weights or inferential comparisons. Domestic means foreign=0; foreign means foreign=1. Panels use observed rep78 categories 1 through 5; five cars with missing ratings are excluded. Empty origin groups retain N=0 and unavailable means/SDs. Missing observations are excluded separately for each variable and group. Repair record is the stored ordinal 1978 rating; its mean and SD describe the numeric coding. Labels retain the dataset's units: headroom in inches, trunk volume in cubic feet, weight in pounds, length in inches, turning circle in feet, displacement in cubic inches, and gear ratio as a ratio.
